traferium

Data can be complex.
Migration shouldn't be.

DATA MIGRATION

Migrate data, tables, views, stored procedures, functions code, OLAP, OLTP, etc.

TRANSFER SAFETY

Assured data quality, custody and provenance for organizational data.

EASE & SIMPLICITY

Simply select a data source and objects to migrate, and initiate migration.

CLOUD OPTIMIZATION

Snowflake's multi-cluster, shared architecture provides secure, low-maintenance data access.

DATA QUALITY ENHANCEMENT

Data profiling provided to examine, cleanse and analyze existing data.

PROCESS AUTOMATION

Reduce or eliminate code development time through automation.

Traferium, powered by NewWave, is the first & only automated tool that allows easy data selection and initiation for the migration of organizational data to the cloud.

Data and its value grow exponentially, yet getting data to the cloud to manage that scale and extract value continues to be unnecessarily hard.

Built to support the Snowflake Cloud Data Platform, Traferium quickly, safely, and automatically migrates your data in any format, from any storage to the cloud.
